

DANAS Technology is a small business woman-owned company that provides computer hardware and professional services. We offer a variety commercial-off-the-shelf (COTS) products, modified and custom computer hardware solutions, and technical professional services at exceptional prices.

DANAS Technology works closely with key team members within your company to identify the optimal bill-of-materials, document the statement of work, and manage the supply chain to ensure that we maintain the appropriate inventory levels and staff required to meet your objectives.

DANAS Technology has access to a number of OEM computer manufacturers' products and services. We source over 400,000 computer-related products from our distributors, and are capable of leveraging various contract vehicles for special pricing for government, state and local customers.
